Overview

We want you to review all the materials from this semester, and get some practice in taking exams.

This is a comprehensive final that not only covers everything from CSE 021, but also CSE 020. You should get more comfortable with writing programs on paper. The problems are structured based on the order that we covered various topics in class. So, as you progress through this sample exam, the questions will get harder.

In the **first 90 minutes** of the lab, take the sample exam without any computer aid. In the **next 30 minutes**, check your answers with Eclipse or your notes. Then, perform a self-correction session while your TA shows and discusses the answers to the sample exam. Finally, you will submit your answers to some questions (stated below) related to this assessment lab session to get full credit for this week's lab.

If you cannot make the lab session then you must see the TA at Office Hours or meet with them to get a sample final. Then you must submit the lab assignment questions to get credit for this lab. Attendance for this lab is mandatory, unless you have a valid reason for missing it.

What to hand in

When you are done with this lab assignment, answer the following 3 questions in a text or Word file, name it **Lab14**.txt/doc/docx, and submit:

1. What is your score on the sample exam?
2. Show one problem you fixed with the help of Eclipse or notes (if any)
3. Any topics or problems you have trouble understanding? (if any)

You DO NOT need to submit the answers to the sample exam.
